Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-8, 11 (in part), 12, and 13, drawn to a method of screening for an agent that modulates P2Y15 activity.
 - II. Claims 9, 10, 11 (in part), drawn to a method of identifying an agent that binds to P2Y15 polypeptide.
 - III. Claims 14-18 (in part), drawn to a reagent that modulates the activity of a P2Y15 polypeptide and a pharmaceutical composition comprising the reagent.
 - IV. Claims 14-18 (in part), drawn to a reagent that modulates the activity of a P2Y15 polynucleotide and a pharmaceutical composition comprising the reagent.
2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is considered to be a method of screening for an agent that modulates P2Y15 activity.

The special technical feature of Group II is considered to be a method of identifying an agent that binds to P2Y15 polypeptide.

The special technical feature of Group III is considered to be a reagent that modulates the activity of a P2Y15 polypeptide and a pharmaceutical composition comprising the reagent.

The special technical feature of Group IV is considered to be a reagent that modulates the activity of a P2Y15 polynucleotide and a pharmaceutical composition comprising the reagent.

Accordingly, Groups I-IV are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept. Thus, unity of invention is lacking and restriction is appropriate.
